Learning activities

Answer the follow questions:

a) What is e-mail?

Is a communication system based on sending and receiving electronic messages through computers.

b) How the @ symbol appeared?

Ray Tomlinson chose the @ symbol to tell which user was "at" what computer. The @ goes in between the user's login name and the name of his/her host computer.

c) What is ARPANET?

Arpanet is the idea of building a network of computers that could exchange information

E-mails:

Subject: Importance of Email

Hello Rodolfo! Today I come to talk about the tool so important these days, e-mail, it provides us with easy access to communication, is widely used in the professional field because it helps us get information quickly. Do you want to use this tool for our project in the course?

Goodbye Karine Gallucci

Response:

Subject: Re: Importance of Email

Good morning, Karine. I think it's a great idea to use email for our communication. I believe it is a tool and very simple to use and very useful due to its safety and practicality.
Att, Rodolfo Scarp.
